Bobby Lee Fair Jr., D.P.T, M.D., LMT
plaintiff

versus
Lakes Crossing Center
Doctor Culpepper
defendants

3:20-cv-00491

Civil Rights Complaint Pursuant To U.S.C 42 § 1983

Comes Now, The Indefatigable Doctor Bobby Lee Fair Jr, in order to pray to the Courts for relief in that he is presently being held against his will at Lakes Crossing Center on grounds that are not lawful and daily being insulted on a personal level.

Doctor Fair was arrested on May 21, 2020 for a Gross Lack of Insight, a charge that has a maximum penalty of ten (10) days in jail but law was perverted in order to make him submit to those that he does not particularly respect. Dr Fair is a law abiding citizen, and is familiar with his rights. He passed a Nelson Hearing in Washoe County, ifareffa Inquiry too. Dr Fair was denied a probable cause hearing, a Bond Reduction Hearing, and has heretofore not been arraigned on any charge. He saw a Judge on July 8 for a So-Called competency hearing, but Deputies ended his webinar before witnesses, ending in Dr Fair's being sent to Lakes Crossing.

Dr. Fair presented at Lakes Crossing with a positive mood and outlook, willing to work to prove his competency in a short period of time. But Doctor Culpepper, whom Dr. Fair is familiar with from Reno Behavioral,

1

6
7 began a program of personal persecution due to the fact
8 that Dr. Fair and he do not care for each other on a personal
9 level.

10 Dr. Culpepper began by deleting a good medicine from
11 regimen that is agreed upon by two very astute local
12 physicians, Dr. Angelene Lawrence and Dr. David Alan Rich.
13 Lortabia, Depakote, and Klonopin help Dr. Fair to remain lucid
14 through his battle with Major Depression. Notwithstanding
15 this, Dr. Culpepper has Dr. Fair taking Zyprexa under
16 threat of violence. One instance of this violence has
17 already been carried out against Dr. Fair: techs bursted
18 into his cell to draw his blood when he already agreed
19 to give the draw with no problem.

20 Dr. Culpepper has flagrantly disobeyed the first premise
21 of the Hippocratic Oath: "First, Do NO Harm" in several
22 manners. The very manual that outlines the treatment
23 program for Lakes crossing clearly states that all prescription
24 of medication shall be preceded by a psychiatric eval
25 days in a confinement cell. (I have been here already 17)

26 The COVID-19 virus was the ostensible reason for
27 my confinement at first, but after 14 days, they now claim
28 that my confinement is to alter my behavior. But the question
29 arises, "What behavior could I demonstrate in a solitary cell
30 that dictates that I should stay in there?" When will I get
31 a chance to demonstrate my positivity on the inside? Dr. Culpepper
32 is quoted as saying "You just have to 'beake' for as long as
33 it takes." This highlights his intent to confine me for an indefinite
34 period of time, and heretofore, no treatment has commenced. Please
35 give me relief.
